Multi Publishing Content component - TODO list

Posted by Jooglar - 2008/06/02 15:31

Hi everyone,

As I did with the Virtual Newspaper Manager, here is a TODO list waiting for your suggestions for the next version. Please, write each suggestion/wish on one message each, so it is clearer.

Thank you all!

SENDING CONTENT TO NON-JOOMLA SITES:

I have an existing xoops installation where there are a lot of articles as well as other modules.

Well, I was wondering if it was possible to mention somewhere in the config file the field names. If this is possible then one can send content from Joomla to any CMS because the wrapperMySQL.php does not touch the remote nstallation and simply understands field names from joomla default.
