
Keep getting signed out when I navigate away.

Posted by darthlafollette - 2008/06/13 17:06

My contacts don't show up in the module when I go back to the home page. I linked to the component with a menu item in the user menu. When I go back to the messenger I am signed out. How do I keep this from happening, and how do I get me contacts to show in the module? I assume they are related.
