## [FIXED]Cannot install JWeb Messenger - Parse Error

Posted by mafi0z - 2008/04/12 01:43

---

using Joomla 1.5.1  
PHP5

When i click install..

Parse error: syntax error, unexpected '}' in

C:\wamp\www\page\administrator\components\com\_jwebmessenger\install.jwebmessenger.php on line 7

---

Try downloading the file again from here:

Joomla Web Messenger (beta)

I changed a bit the code.

Regards.

fixed :)  
Thank you

One question...how do i get it to show up in front-end?

i made a menu item for jweb messenger, but when i click it, the page is blank..

---

Once you installed the component successfully, you can create a menu link as it is done normally in Joomla:

Menus / Menu Manager / Menu Items (on the menu you want)/ New

Once you clicked on New, select the component Joomla Web Messenger.

Then , write a Title and an Alias and you are done.

Regards,  
Raúl.
