
What happens with Jooglar

Posted by butch777 - 2009/06/09 18:46

I noted that Jooglar is not present in the forum for a long time ago.

I want to know what is happening with the project, the new version of the software and if there will be support for it in the future.

I think that Virtual Newspaper Manager is a very good product and I wish a long life for the project.

Somebody can respond these questions ?

Thanks
