how to set Admin as default author for articles ?

Posted by adrianoo - 2009/07/14 11:14

---

when I copy news to joomla content the dont display correct. I mean that not every article is showing as it should. Those which dont display correctly has an empty area under the "Author" column. But those which are displaying correctly has there ADMIN. So when I want to make them displaying correctly i have to edit each article and change the author to Admin.

does anybody know how to set Admin as default author for articles ?
